#5	Static	Client Testimonial Quote Graphic	1,180	102	18	7.1%	IG+FB

Post Type Distribution

04 BRANDED CREATIVE STRATEGY OVERVIEW

Design System & Content Pillar Breakdown

Brand Colours & Fonts

Consistent brand palette applied across all 20+ creatives — primary brand colour, accent, and white. Single font family used for all text, maintaining visual identity across Instagram and Facebook.

Content Pillars Used

5 content pillars rotated weekly: Educate (tips/how-to), Inspire (quotes/motivation), Showcase (before/after, results), Connect (behind-the-scenes, team), and Convert (offers, CTAs).

Reel Strategy

Short-form video (15–30 sec) created for maximum organic reach. Behind-the-scenes and customer spotlights performed best — averaging 9.4% engagement rate vs 7.1% for static posts.

Carousel Strategy

Swipeable carousels used for educational and results-driven content. Carousels drove the highest saves (avg 36 saves/post) — indicating strong content value and bookmarking intent.

Hashtag Strategy

Clustered hashtag sets of 15–20 per post. Mix of broad (#DigitalMarketing), niche (#HyderabadBusiness), and branded (#ClientName) hashtags. Rotated weekly to avoid shadow-banning.

05 GROWTH SUMMARY & RECOMMENDATIONS

4-Month Campaign Results & Next Steps

Key Achievements

- Grew organic Instagram engagement rate from 3.2% to 8.6% over 4 months without paid ads.
- Designed 20+ branded creatives using Canva — maintaining consistent visual identity across both platforms.
- Reels drove highest reach — averaging 1,600+ reach per reel vs 1,100 for static posts.
- Carousels drove the highest saves — indicating strong educational value and audience intent to revisit.
- Managed 2+ client pages simultaneously — delivering weekly content calendars on-time every week.
- Implemented 5-pillar content strategy improving content consistency and reducing ad-hoc posting by 100%.

Recommendations for Next Quarter

Priority: High	Scale Reels to 5/Month Reels consistently outperform static posts. Increasing output from 3 to 5 per month can accelerate follower growth by 40–60% based on current trend data.	01
Priority: High	Launch Instagram Story Polls & Q&As; Stories with interactive stickers drive DM conversations and boost algorithmic ranking. Adding 3–4 story interactions per week is a zero-cost engagement booster.	02
Priority: Medium	Introduce Meta Ads for Top Performing Posts Boosting top 2 organic posts per month with ■500–■1,000 can significantly extend reach to new audiences. Carousels and reels with high save rates are best candidates.	03
Priority: Medium	Build a UGC (User-Generated Content) Campaign Encourage clients' customers to tag the brand. Reposting UGC builds social proof and reduces creative workload by 20–30% while maintaining posting frequency.	04

This report was prepared as an independent portfolio project documenting social media management work. Engagement metrics represent tracked data via Meta Business Suite Insights. Client page names are withheld for confidentiality.
