02 GA4 TRAFFIC ANALYSIS

Organic Traffic Growth — Jan to Apr 2026

Engagement metrics measured after on-page SEO and content optimisation was applied (Jan–Apr 2026). Bounce rate reduced from 58% to 42%; average session duration and pages-per-session both improved significantly.

Top Performing Pages by Organic Traffic

Page / URL	Sessions	Avg. Duration	Bounce Rate	Keyword Ranked
/blog/biryani-recipe-guide	342	3m 12s	38%	biryani recipe blog
/blog/seo-tips-beginners	289	2m 55s	41%	SEO tips for beginners
/blog/google-ads-guide-2026	198	2m 40s	44%	google ads guide 2026
/blog/content-marketing-strategy	152	3m 05s	39%	content marketing strategy
/blog/digital-marketing-hyd	141	2m 20s	49%	digital marketing hyderabad

Page / URL	Sessions	Avg. Duration	Bounce Rate	Keyword Ranked
/blog/on-page-seo-checklist	108	2m 48s	43%	on page SEO checklist

03 ON-PAGE SEO OPTIMISATION

Optimisation Checklist Applied

Element	Status	Action Taken
Title Tags	Optimised	Added primary keyword in first 60 chars across all 6 blog pages
Meta Descriptions	Optimised	Wrote unique, click-worthy meta descriptions for each page (150-160 chars)
H1 / H2 Structure	Optimised	Ensured single H1 per page; H2s used for keyword-rich subheadings
Image Alt Text	Optimised	Added descriptive alt text to all 24 images across published posts
Internal Linking	Optimised	Added 3-5 contextual internal links per post to improve crawlability
Content Length	Optimised	Expanded blog posts from avg 300 words to 800+ words with keyword integration
Page Speed	Improved	Compressed images and removed render-blocking scripts — PageSpeed 54 to 71
Schema Markup	Added	Implemented Article + BlogPosting JSON-LD schema on all published posts
XML Sitemap	Added	Generated and submitted sitemap to Google Search Console
Mobile Friendly	Pass	All pages pass Google Mobile Usability test after CSS fixes

Before vs After — Content Optimisation Example

BEFORE		AFTER
Title: Biryani Recipe	→	Title: Authentic Hyderabad Biryani Recipe Step-by-Step Guide 2026
Word Count: 290 words — thin content, no structure	→	Word Count: 1,150 words — ingredients, steps, FAQ section, and related links
Meta Description: None (auto-generated snippet)	→	Meta Description: Learn to make authentic Hyderabad Dum Biryani at home. Easy step-by-step recipe with tips, spice guide, and serving ideas. (157 chars)
Internal Links: 0	→	Internal Links: 4 contextual links to related posts and category pages
Schema: None	→	Schema: Recipe + BlogPosting JSON-LD — enables rich results in Google

04 RECOMMENDATIONS & NEXT STEPS

Data-Driven Actions to Further Grow Organic Traffic

01	Target Medium-Difficulty Keywords Next The 3 "Easy" keywords are now published and ranking. The next phase should target "digital marketing hyderabad" (3,600 vol, KD 41) and "content marketing strategy" (3,200 vol, KD 44) with long-form, link-worthy content to capture more traffic.	Priority: High
02	Build Internal Link Clusters (Topic Silos) Group related blog posts into topic clusters with a pillar page at the top. For example: create a "SEO Hub" pillar page and link all SEO-related posts to it. This signals topical authority to Google and boosts all cluster page rankings.	Priority: High
03	Increase Publishing Frequency to 3 Posts/Month Current output is 1–2 posts/month. Increasing to 3 posts using AI-assisted drafting (ChatGPT + manual editing) could double keyword coverage in 3 months without significantly increasing production time.	Priority: Medium
04	Acquire Backlinks via Guest Posting & Directories Domain Authority is currently low (estimated DA 12–15). Submitting 2–3 guest posts to marketing blogs and listing the site in relevant directories (AllBlogTools, BlogCatalog) can improve DA and boost overall rankings within 2–3 months.	Priority: Medium
05	Set Up Goal Tracking in GA4 for Conversions Currently tracking sessions and pageviews only. Setting up GA4 conversion events (newsletter signups, contact form submissions, time-on-page goals) will allow measuring ROI of SEO efforts and identifying which keywords drive actual leads.	Priority: Medium
06	Refresh & Expand Top 3 Posts Every 6 Months The top 3 organic pages (biryani recipe, SEO tips, Google Ads guide) should be updated every 6 months with new data, updated stats, and additional FAQs. Content freshness is a ranking signal — refreshed posts consistently outperform stale ones.	Priority: Ongoing

This SEO project was conducted as an independent portfolio project. All traffic data represents simulated analytics for demonstration purposes. Keyword data sourced from SEMrush. On-page recommendations follow Google Search Central best practices.
