Executive Summary

This report covers the Google Merchandise Store's digital performance for the 28-day period from April 12 to May 9, 2026, using Google Analytics 4 (GA4) data. The store shows strong growth across key metrics with notable improvements in revenue, key events, and purchase volume compared to the previous period.

Metric	Value	vs Previous	Status
Active Users	79,000	—	Stable
New Users	68,000	—	Stable
Total Sessions	98,941	—	Stable
Event Count	1,200,000	+13.0%	Good
Key Events	86,000	+24.9%	Excellent
Purchases	1,100	+18.5%	Good
Total Revenue	\$166,000	+18.5%	Excellent
Total Purchasers	968	—	Stable
Avg Engagement Time	52 seconds	—	Needs Work

Key highlight: Revenue and purchases grew by over 18% compared to the previous period, driven by strong key event performance (+24.9%). Direct traffic dominates at 64.68% of all sessions but has the lowest engagement rate (23.59%), suggesting a large portion may be bot or branded traffic.

Traffic Acquisition by Channel

Total sessions: 98,941 across 10 channels. The table below shows the full channel breakdown with sessions, engagement rate, and average session duration.

#	Channel	Sessions	Share	Engaged Sessions	Engagement Rate	Avg Duration
1	Direct	63,993	64.68%	15,094	23.59%	28s
2	Organic Search	16,376	16.55%	11,458	69.97%	1m 02s
3	Unassigned	6,656	6.73%	412	6.19%	50s
4	Cross-network	4,484	4.53%	3,713	82.81%	1m 38s
5	Paid Search	2,883	2.91%	1,847	64.07%	1m 08s
6	Referral	2,164	2.19%	1,593	73.61%	1m 32s
7	Organic Social	632	0.64%	452	71.52%	1m 15s
8	Email	189	0.19%	143	75.66%	1m 35s
9	Organic Shopping	268	0.27%	229	85.45%	1m 01s
10	Organic Video	18	0.02%	10	55.56%	3m 34s

Channel Insights

Direct (64.68%)

Dominates sessions but has a very low engagement rate of 23.59% and only 28s avg session. This suggests a large volume of branded or returning visitors who quickly find what they need, or potential bot traffic that needs filtering.

Organic Search (16.55%)

Second largest channel with a strong 69.97% engagement rate and 1m 02s avg session. SEO is working well — this is high-quality traffic with genuine purchase intent.

Cross-network (4.53%)

Highest engagement rate at 82.81% with 1m 38s avg session. Paid campaigns across networks are attracting highly engaged users. Strong ROI signal.

Organic Social (0.64%)

Only 632 sessions — very low for a major brand. Social media presence needs significant investment. 71.52% engagement rate shows quality is good, but volume is poor.

Engagement Metrics

Metric	Value	Benchmark	Analysis
Avg Engagement Time	52 seconds	2–3 min (e-comm)	Below benchmark — users leave quickly
Engaged Sessions / User	0.44	1.0+ ideal	Low — most users don't engage deeply
Total Page Views	308,000	—	Strong volume of page interactions
Total Event Count	1,200,000	+13% vs prev	Growing user interactions site-wide
Overall Engagement Rate	35.01%	50–70% (e-comm)	Dragged down by low Direct traffic engagement

Top Pages & Screens

Total 856 pages tracked. Top pages by views (Apr 12 – May 9, 2026):

#	Page Path	Category	Key Insight
1	/ (Homepage)	Entry point	Most visited — 40 active users at any time. Drives all downstream traffic.
2	/shop/new	New arrivals	High interest in new products — a strong remarketing opportunity.
3	/shop/apparel/mens	Category page	Men's apparel is the top product category — stock and SEO priority.
4	/checkout	Conversion	High checkout visits indicate strong purchase intent from warm traffic.
5	/shop/clearance	Sale section	Clearance section popular — price-sensitive audience segment present.

Revenue & Conversions

Revenue Metric	Value	vs Previous	Notes
Total Revenue	\$166,000	+18.5%	Strong growth — all from purchase revenue
Purchase Revenue	\$166,000	+18.5%	100% of revenue from product purchases
Ad Revenue	\$0.00	—	No ad monetization in place
Total Purchasers	968	—	968 unique customers made a purchase
First Time Purchasers	810	83.7%	83.7% of purchasers are new customers
Repeat Purchasers	158	16.3%	Retention opportunity — low repeat rate
Avg Revenue per Purchaser	\$171.5	—	\$166K / 968 purchasers

Key Insights

01

Direct traffic dominates but is low quality

Direct traffic accounts for 64.68% of all sessions but has only a 23.59% engagement rate and 28 second average session — the lowest of all channels. This inflates total session counts but contributes less to conversions. This pattern is common with branded traffic or bot visits.

02

Organic Search is the highest-quality paid-free channel

With 16,376 sessions, 69.97% engagement rate, and 1m 02s average session duration, organic search delivers far better quality visits than direct. Every SEO investment made here has a measurable impact on engaged, purchase-intent traffic.

03

Cross-network paid campaigns show the strongest engagement

Cross-network traffic (4.53% share) achieves an 82.81% engagement rate — the highest of all channels. Despite lower volume, these users are highly interested. Increasing budget here could significantly boost conversions.

04

Social media traffic is critically underperforming

Organic Social delivers only 632 sessions (0.64%) for what is a major global brand. While engagement rate is good at 71.52%, the volume is negligible. A dedicated social content strategy could unlock thousands of quality sessions monthly.

05

First-time purchasers dominate — retention is weak

83.7% of purchasers are first-time buyers. Only 16.3% return to buy again. For an e-commerce store, a healthy repeat purchase rate is 25–40%. Post-purchase email flows and loyalty programmes are missing or underperforming.

Recommendations

Based on the data analysis, here are 6 actionable recommendations prioritised by impact:

Investigate and filter Direct traffic

Audit direct traffic to identify bot or spam sessions. Set up bot filtering in GA4 and create UTM parameters for all internal links. This will make engagement rate data more accurate and reveal the true performance of other channels.

Build a post-purchase email retention programme

With 83.7% first-time purchasers, a well-timed email sequence (3–5 emails over 30 days) can convert new buyers into repeat customers. Target: increase repeat purchase rate from 16.3% to 25%+ within 90 days.

Scale Cross-network and Paid Search campaigns

Cross-network (82.81% engagement) and Paid Search (64.07% engagement) both outperform direct traffic significantly. Reallocating 15-20% of the direct traffic budget to these channels should increase total engaged sessions.

Launch a dedicated Instagram and Social content strategy

Organic Social drives only 0.64% of sessions. A consistent posting schedule (5–7 posts/week) with product showcases, behind-the-scenes content, and UGC reposts could grow social traffic by 300%+ within 60 days.

Improve on-site engagement time

Average session engagement is only 52 seconds vs the 2–3 minute e-commerce benchmark. Add product videos, customer reviews, and related product recommendations on product pages to increase time on site.

Optimise men's apparel pages for SEO

/shop/apparel/mens is already a top page. Investing in keyword-targeted product descriptions, category page content, and schema markup here will compound organic search gains over time.
